

How to verify the names of species

The spelling and the current accepted name of all the species on a list can be checked in one step using the on-line tool found at <https://tnrs.biendata.org> . Below is an example.

Enter the names of all of the species you are donating. Click submit.

Scientific names to check

campanuls aucjeri	————	misspelled, genus starts with uppercase
Aster umbellatus	————	obsolete name
Digitalis purpureus	————	gender of genus and species should agree
Aconitum 'Ivorine'	————	cultivar

Enter up to 5000 scientific names

SUBMIT **CLEAR**

If you include a cultivar in your list, only the genus can be checked. When you fill out your donor sheet, just by copy and paste the accepted names generated by the program. An example follows:

BEST MATCH SETTINGS		MATCH 0.53	DOWNLOAD DATA	DOWNLOAD SETTINGS		Copy the names in this column into your donor sheet
▲	Name Submitted	Name Matched	Source	Overall Score	Taxonomic Status	Accepted Name
	campanuls aucjeri	Campanula aucheri A. DC. (+1 more)	TROPICOS USDA	.94	Spelling and capitalization corrected Accepted	Campanula aucheri A. DC. ↔ ↔
	Aster umbellatus	Aster umbellatus Mill. (+1 more)	TROPICOS WFO WCVF	1.00	The new name Synonym	Doellingeria umbellata (Mill.) Nees ↔ ↔ ↔
	Digitalis purpureus	Digitalis purpurea L. (+1 more)	TROPICOS WFO WCVF USDA	.95	Genus and species agree Accepted	Digitalis purpurea L. ↔ ↔
	Aconitum 'Ivorine'	Aconitum Finet & Gagnep. (+1 more)	TROPICOS	.83	Only the genus can be checked Accepted	Aconitum Finet & Gagnep. ↔
